## Vol. 25, No. 1

*Special Issue: Numerical Methods in Chemistry*

Preface . . . . . 1

On variable-step methods for the numerical solution of Schrödinger equation and related problems
G. Avdelas (Chania, Crete, Greece) and T.E. Simos (Xanthi, Greece) . . . . . 3
Individually selecting multi-reference CI and its application to biradicalic cyclizations
B. Engels (Würzburg, Germany), M. Hanrath and C. Lennartz (Bonn, Germany) . . . . . 15
Numerical operations on oscillatory functions
L.G. Ixaru (Bucharest, Romania) . . . . . 39
Angle dependent total cross sections and the optical theorem
T.V. Levitina and E.J. Brändas (Uppsala, Sweden) . . . . . 55
Distributions and averages of molecular conformations
P.G. Mezeya (Budapest, Hungary) . . . . . 69
New insights in the development of Numerov-type methods with minimal phase-lag for the numerical solution of the Schrödinger equation
T.E. Simos (Xanthi, Greece) and P.S. Williams (London, UK) . . . . . 77
Solving a singular DAE model of unconfined detonation
J.A. Sturgeon, R.M. Thomas (Manchester, UK) and I. Gladwell (Dallas, TX, USA) . . . . . 83
High order Bessel fitting methods for the numerical integration of the Schrödinger equation
J. Vigo-Aguiar (Salamanca, Spain) . . . . . 97
Parallel Rosenbrock methods for chemical systems
D.A. Voss and A.Q.M. Khaliq (Macomb, IL, USA) . . . . . 101
On 'infinite basis set limits' in molecular electronic structure calculations
S. Wilson (Oxfordshire, UK) and D. Moncrieff (Tallahassee, FL, USA) . . . . . 109

## Vol. 25, No. 2

Correlations between theoretical and experimental determination of heat of formation of certain aromatic nitro compounds
C. Chen and J.C. Wu (Taoyuan, Taiwan, ROC) . . . . . 117
Prediction of programmed-temperature retention values of naphthas by wavelet neural networks
X. Zhang, J. Qi, R. Zhang, M. Liu, Z. Hu (Gansu, PR China), H. Xue (Lanzhou, PR China) and B. Fan (Paris, France) . . . . . 125
Evaluation of Spartan semi-empirical molecular modeling software for calculations of molecules on surfaces: CO adsorption on Ni(111)
T.Y. Zakharian and S.R. Coon (Cedar Falls, IA, USA) . . . . . 135
Stepwise assembling of polypeptide chain energy distributions
S.G. Jacchieri (São Paulo, Brazil) . . . . . 145
Visualization methods in analysis of detailed chemical kinetics modelling
A.B. Bendtsen, P. Glarborg and K. Dam-Johansen (Lyngby, Denmark) . . . . . 161
A QSPR model for the prediction of the gas-phase free energies of activation of rotation around the N–C(O) bond
J. Leis and M. Karelson (Tartu, Estonia) . . . . . 171
Implementation of similarity model in the CSB system for chemical reaction predictions
G. Fic and G. Nowak (Rzeszów, Poland) . . . . . 177

ChromWin — A computer program for the determination of enantiomerization barriers in dynamic chromatography
O. Trapp and V. Schurig (Tübingen, Germany) . . . . . 187
QSPR studies of PCBs by the combination of genetic algorithms and PLS analysis
Z. Daren (Beijing, People's Republic of China) . . . . . 197
High order spatial discretisations in electrochemical digital simulation. 2. Combination with the extrapolation algorithm
J. Strutwolf (London, UK) and D. Britz (Århus, Denmark) . . . . . 205

## Vol. 25, No. 3

Simulation of acid–base condition and copper speciation in the fish gill microenvironment
S. Tao, Y. Wen, A. Long, R. Dawson, J. Cao and F. Xu (Beijing, PR China) . . . . . 215
Improved convergence and speed for the distance geometry program APA to determine protein structure
W. Glunt and T. Hayden (Lexington, KY, USA) . . . . . 223
Characteristic substructures in sets of organic compounds with similar infrared spectra
P.N. Penchev (Plovdiv, Bulgaria) and K. Varmuza (Vienna, Austria) . . . . . 231
Simultaneous quantitative UV spectrophotometric determination of multicomponents of amino acids using linear neural network
C. Yin, Y. Shen (Hefei, PR China), S. Liu (Chongqing, PR China), Q. Yin, W. Guo and Z. Pan (Hefei, PR China) . . . . . 239
Monte Carlo simulation towards ripple phase modelling
K. Kubica (Wrocław, Poland) . . . . . 245
Modeling and prediction for discharge lifetime of battery systems using hybrid evolutionary algorithms
H. Cao, J. Yu, L. Kang, H. Yang and X. Ai (Wuhan, People's Republic of China) . . . . . 251
Dissipative exponentially-fitted methods for the numerical solution of the schrödinger equation
T.E. Simos (Xanthi, Greece) and P.S. Williams (London, UK) . . . . . 261
A modified Runge–Kutta method with phase-lag of order infinity for the numerical solution of the Schrödinger equation and related problems
T.E. Simos (Xanthi, Greece) and J.V. Aguiar (Salamanca, Spain) . . . . . 273
Protein structure determination by non-parametric regression and knowledge-based constraints
S. Jyothi and R.R. Joshi (Mumbai, India) . . . . . 281
Recognition of environmental and genetic effects on barley phenolic fingerprints by neural networks
J. Gorodkin (Lyngby, Denmark), B. Søgaard, H. Bay (Frederiksberg, Denmark), H. Doll (Roskilde, Denmark), P. Kølster (Frederiksberg, Denmark) and S. Brunak (Lyngby, Denmark) . . . . . 299
Book reviews . . . . . 309

## Vol. 25, No. 4

*Special Issue*: *Open Problems of Computational Biology* (7)

Editorial
Towards understanding life itself
A.K. Konopka (Gaithersburg, MD, USA) . . . . . 313

*Feature article*
Robert Rosen (1934–1998): a snapshot of biology's Newton
D.C. Mikulecky (Richmond, VA, USA) . . . . . 317

*Methodological overviews*
Which craft is best in bioinformatics?
T.K. Attwood and C.J. Miller (Manchester, UK) . . . . . 329
The emergence of complexity: science coming of age or science growing old?
D.C. Mikulecky (Richmond, VA, USA) . . . . . 341

*Research reviews*
Non-equilibrium proteins
W. Klonowski (Warsaw, Poland) . . . . . 349

Network thermodynamics and complexity: a transition to relational systems theory
D.C. Mikulecky (Richmond, VA, USA) . . . . . 369
Information theory in ecology
R.E. Ulanowicz (Solomons, MD, USA) . . . . . 393

*Research papers*
Sequence alignment: an approximation law for the *Z*-value with applications to databank scanning
J.N. Bacro (Paris, France) and J.P. Comet (Evry, France) . . . . . 401
Amino acid residue environments and predictions of residue type
W. Kim and W.J. Wilbur (Bethesda, MD, USA) . . . . . 411

*Book reviews*
Computational Molecular Biology: An Algorithmic Approach
J. Fickett (King of Prussia, PA, USA) . . . . . 423
Post-genome Informatics
J. Heringa (London, UK) . . . . . 425
Neural Networks and Genome Informatics
T. Gaasterland (New York, NY, USA) . . . . . 427

## Vol. 25, No. 5

Pressure dependence of ionic polarizabilities in crystals
M. Carolina Monard (São Carlos, Brazil), J.A.O. Bruno, J. Faour and A. Batana (Buenos Aires, Argentina) . . . . . 426
Correlations between theoretical and experimental determination of heat of formation of certain aliphatic nitro compounds
P.C. Chen (Taichung, Taiwan, ROC), J.C. Wu (Taoyuan, Taiwan, ROC) and S.C. Chen (Taichung, Taiwan, ROC) . . . . . 439
Experimental study of precipitating systems; computerised analysis of the optical transmittance and associated noise
J.A. Poce-Fatou, R. Alcántara, J.J. Gallardo and J. Martín (Cádiz, Spain) . . . . . 447
Resolution by polarographic techniques of the ternary mixture of captan, captafol and folpet by using PLS calibration and artificial neuronal networks
A. Guiberteau, T. Galeano, N. Mora, F. Salinas, J.M. Ortíz (Badajoz, Spain) and J.C. Viré (Brussels, Belgium) . . . . . 459
Prediction of enthalpy of alkanes by the use of radial basis function neural networks
X. Yao, X. Zhang, R. Zhang, M. Liu, Z. Hu (Lanzhou, People's Republic of China) and B. Fan (Paris, France) . . . . . 475
A new numerical procedure to determine the VLE curve
W. Okrasiński (Zielona Góra, Poland), M.I. Parra (Zielona Góra, Poland; Badajoz, Spain) and F. Cuadros (Badajoz, Spain) . . . . . 483
Three-dimensional quantitative structure–activity relationship for several bioactive peptides searched by a convex hull–comparative molecular field analysis approach
T.-H. Lin and J.-J. Lin (Taiwan, Taiwan, ROC) . . . . . 489
Study of precipitant systems by computerised simulation. Influence of optical elements on the noise associated with the transmittance
J.A. Poce-Fatou, R. Alcántara and J. Martín (Puerto Real, Spain) . . . . . 499
Erratum to "High order spatial discretisations in electrochemical digital simulation. 2. Combination with the extrapolation algorithm"
J. Strutwolf (London, UK) and D. Britz (Århus, Denmark) . . . . . 509
High order spatial discretisations in electrochemical digital simulation. 2. Combination with the extrapolation algorithm
J. Strutwolf (London, UK) and D. Britz (Århus, Denmark) . . . . . 511

## Vol. 25, No. 6

A numerical modelling of voltammetric reduction of substituted iodobenzenes reaction series. A relationship between reductions in the consecutive-mode multistep system and a multicomponent system. Determination of the potential variation of the elementary charge transfer coefficient
P. Sanecki (Rzeszów, Poland) . . . . . 521

Prior-knowledge-based feedforward network simulation of true boiling point curve of crude oil
C.-w. Chen and D.-z. Chen (Hangzhou, People's Republic of China) . . . . . 541
Research and prediction of coordination reactions between CPA-mA and some metal ions using artificial neural networks
L. Dong, A. Yan, X. Chen (Lanzhou, People's Republic of China), H. Xu (Ningxia, People's Republic of China) and Z. Hu (Lanzhou, People's Republic of China) . . . . . 551
Multi-isotopic modelling of mass spectra: a procedure for verification of the fragmentation hypothesis for the organometallic and coordination compounds
A.J. Gorączko and J.A. Szymura (Bydgoszcz, Poland) . . . . . 559
Binary coding of Kekulé structures of catacondensed benzenoid hydrocarbons
S. Klavžar, A. Vesel, P. Žigert (Maribor, Slovenia) and I. Gutman (Kragujevac, Yugoslavia) . . . . 569
Polynomial expressions for the hyper-Wiener index of extended hydrocarbon networks
G.G. Cash (Washington, DC, USA) . . . . . 577
Dynamic optimization of chemical processes using ant colony framework
J. Rajesh, K. Gupta, H.S. Kusumakar, V.K. Jayaraman and B.D. Kulkarni (Pune, India) . . . . . 583
SOM integrated with CCA for the feature map and classification of complex chemical patterns
X. Yan, D. Chen, Y. Chen and S. Hu (Hangzhou, People's Republic of China) . . . . . 597

Volume contents . . . . . 607
Author Index . . . . . 611
Keyword Index . . . . . 613
